FAROMOR.COM

The Faromor Solar Dome maintains the simplicity of an open ridge but minimizes the negative effects of down-drafts and rain/snow entry. It is available in 3 sizes (24", 36", 48") and is used as a "cover" for new or existing open ridges.

The Faromor Mechanical Ridge offers the superior advantage of an unrestricted open ridge design for maximum air exchange. When fully closed, this system allows for maximum light penetration and a draft free seal to keep the elements out.
